

ILLUMINATE THE POSSIBILITIES

Up to 100Mb possible with new Fiber system!

Despite the winter weather, we are making great strides on the fiber to the home project. We have customers using the system for Internet and phone. The TV product looks to be ready for testing in late February & March. This month we want to illuminate the Possibilities of Internet over fiber.

Data Benefits of Fiber to the Home

- With packages starting at 3MB per subscriber, enhanced and upgraded Internet speeds will be available. Fiber allows for speeds greater than 100Mb leaving plenty of room to expand in the future.
- More personal video options are becoming available over the web, as clips, full movies, and broadcast shows. Fiber enables you to enjoy those choices with ease.
- Online gaming and personal media sharing continue to grow placing greater demands on consumer networks. Fiber has the capacity to meet the demand.
